Original Class Design -usemame -password Customer Admin -name -account -create_customer() -login() -assign_account() -add_funds() -view_system_logs() -withdraw_funds() -list_all_info() -transfer_funds() -suspend_account() -view_log() 1 has n ClassName

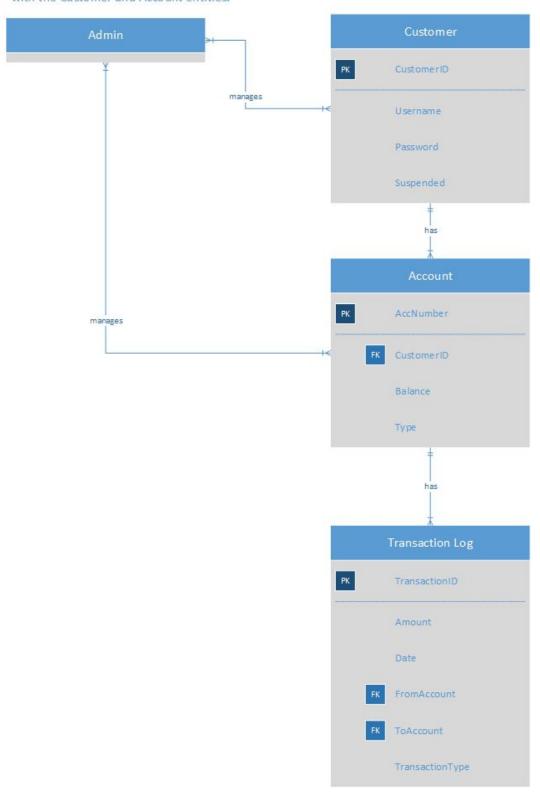

-acct_num -type -balance

+get_balance()

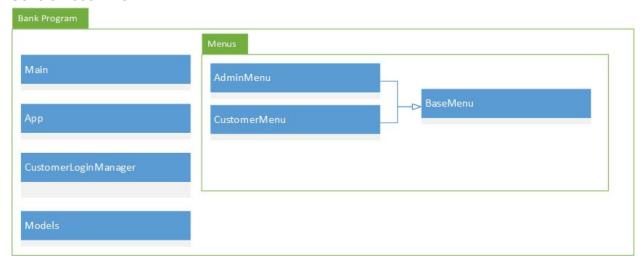

+increment_balance() +decrement_balance()

Entity Relation Diagram

Admin is not an entity, it is an interface. The item here is to show how it interacts with the Customer and Account entities.
